Introduction

These are the basic sticking patterns used for both hands and feet. I refer to the whole set of patterns – all groupings and cycles of stickings from 1 through 8 – simply as "1 to 8".

Groups Of	Notes	Example Sticking Patterns
1	Singles	RLRLRLR, LRLRLRLR
2	Doubles	RRLLRRLL, LLRRLLRR
3	All permutations of the stickings of groups of 3	RRR-LLL, RLL, LRR, RRL, LLR
4	Paradiddles, paradiddle inversions and variations	RRRR, LLLL, RRRL, LLLR, RLLL, LRRR, RLRR-LRLL
5	All permutations of the stickings of groups of 5	RLRLL, LRLRR, RLLRL, LRRLR, RLRRL, LRLLR
6	Double paradiddles, paradiddle-diddles, all permutations of the stickings of groups of 6	RLRLRR-LRLRLL, RLRRLL, LRLLRR, RLLRLR-LRRLRL, RLLRRL, LRRLLR
7	All permutations of the stickings of groups of 7	RLRLRLL, LRLRLRR, RLLRRLL, LRRLLRR, RLLRLRL, LRRLRLR
8*	Combinations of any of the previous "subcycles"	(6 + 2) RLRLRRLL, (5 + 3)RLRLLRRR- LRLRRLLL
9*	5 + 4, 2 + 7, etc.	RLRLLRLRR-LRLRRLRLL, RLRLRLRLL, LRLRLRR
10*	7 + 3, 6 + 4, 3 + 5 + 2, etc.	RLRLRLLRLL, LRLRLRRLRR, RLRLRRLRLL, LRLRLLRLRR, RLLRLRRLLRR-LRRLRRLL
11*	5 + 6, 7 + 4, etc.	RLRLLRLRRLL, LRLRRLRLLRR, RLRLLRLRR-LRLRRLRLLL, RLRLRLLRRLL, LRLRLRRLLRR
15*	5 + 5 + 5, 7 + 8, 9 + 6, etc.	RLRLLRLLRRLLR-LRLRRLRRLRRLLRRL, RLRLLRRLLRRLL, LRLRLLRRLLRRL RLLRLLRLRLRR-LRRLRRLRLRLRL

^{*}Note: longer phrases are contructed by simply stringing together smaller subcycles.

To practice these, always play one pattern as an ostinato phrase with your feet, and then "1 to 8" on top of that with your hands.

For example: feet play 3's, hand play 1's, then 2's, then 3's, 4's ... 8's (and beyond) on top of the foot ostinato in 3.

I will now describe briefly each of the 5 "dimensions" that the formula consists of. Please refer to the poster or the individual pdf files for each dimension for further information.

Step 1: The 1st Dimension*

To practice the first dimension exercises, you should play each of the "1 to 8" patterns as an ostinato with your feet, while then playing each of the "1 to 8" patterns (and beyond) against them with your hands.

After finishing all of these exercises, you will have combined every possible cycle and alternating sticking hand-combination with every other possible foot-combination; you will have learned to play all odd and even time signatures; you will have learned to play all odd and even cycles in all odd and even time signatures; and, you will have practiced hand and foot technique, coordination, interdependence and independence, counting and timing, and dynamics and accuracy of layered rhythms.

Step 2: The 2nd Dimension (Reverse Hand & Foot Patterns)*

To practice the second dimension exercises, you should play each of the "1 to 8" patterns as an ostinato with your hands, while then playing each of the "1 to 8" patterns (and beyond) against that with your feet.

*Note: You will encounter identical combinations in different "incarnations" during steps 1 and 2. In fact, one in every 8 exercises reappears in the next set of 8 exercises as an inverted example. This means every 256 exercises you can "skip" 32 exercises since you've already practiced them before.

Step 3: The 3rd Dimension (Cross-Diagonal Coordination)

The 3rd dimension takes the difficulty level up another degree. This set of exercises is a challenging workout; there are no limits to how far you can take this.

In Step 3, you should play each of the "1 to 8" stickings (and beyond) split up between two limbs while then playing all of the "1 to 8" patterns against these with the remaining two limbs. The difference between this step and the previous steps is that the two limbs playing the pattern together should consist of one hand and one foot. There are four unique hand/foot combinations that you can use. The following table lists all combinations that should be practiced:

Use these limbs	Played against these limbs
Right hand, right foot	Left hand, left foot
Right hand, left foot	Left hand, right foot
Left hand, left foot	Right hand, right foot
Left hand, right foot	Right hand, left foot

Step 4: The 4th Dimension (Mixed Note Rates)

Up until now, all notes played have been of the same type/duration (e.g. 16th-notes against 16th-notes). This step again increases the diffculty level by introducing different "note rates" for each of the "1 to 8" patterns played, such as triplets against 8th-notes, or quintuplets against 16th-notes.

Here, start by phrasing each sticking cycle as a group per bar, and then per quarternote. For example, sticking groups of 3 should be played as triplets; groups of 5 as quintuplets; groups of 7 as septuplets, etc.

Then play each group at different note rates. For example: 3's foot pattern as quarter-note triplets, then as 8th-note triplets, then as 16th-note triplets. Do the same with all the hand patterns that you're playing on top of the foot ostinatos.

Practicing these exercises takes a fair amount of creative input on your part. Make up your own musical phrases and create your own patterns and cycles to practice. Play to a quarter-note click-track or metronome. If you experiment with this concept you will find it not only helps your independence and coordination, but it hugely affects your perception of time, groove, feel and note-rate/value; especially the space *between* the notes is what becomes important here.

Step 5: The 5th Dimension (Partial Layers)

Step 5 is the most challenging of all the steps so far: "partial layers" at mixed noterates in 4-way orchestrated polymetric coordination. To practice these exercises, take any of the sticking patterns "1 to 8", and play only one hand (or foot) part of the sticking. With the other hand (or foot) play a different "half" of a sticking.

Take, for example, the following sticking pattern of 5, played RLRLL, RLRLL...

Now, the left hand "drops out" to leave only R-R--, R-R--

The left hand, which is now "free" plays the "left half" of another sticking pattern on top of the 5's: -LL, -LL, -LL (which would be the "left half" of a group of 3 that would normally be played RLL, RLL, RLL, for example).

After practicing this with all sticking patterns "1 to 8", change the note rate of each layer individually. Remember to do this with both hands and feet!

This is the most extreme level of independence and coordination. Add orchestration to these exercises to add yet another challenge. It is highly advanced and complex but this is also the limit to where we can take drumming today!
